Profile

Full Stack Developer | 3+ Years' Experience

I'm a Full Stack Developer with over 3 years of experience building scalable, high-performance web applications. I specialize in front-end technologies such as **HTML**, **CSS**, **Bootstrap**, and **Tailwind CSS**, delivering responsive and visually polished interfaces. I'm proficient in **JavaScript**, with strong expertise in **Vue.js**, **React.js**, and **Next.js** for building interactive, modern UIs.

On the back end, I work with **Node.js**, **PHP**, **Laravel**, **MySQL**, and **MongoDB**, developing robust APIs and data-driven applications. I also have experience integrating **WebSockets** to enable live features such as notifications, chats, and real-time updates. I'm passionate about creating seamless user experiences and writing clean, maintainable code. Whether working on new builds or optimizing existing systems, I bring a strong focus on performance, usability, and scalability.

Education

University of Malakand

Bachelor of Computer Science (3.77 CGPA)

Chakdara Dir Lower, Kpk

2018-2022

Government Higher Secondary School Khwaza Khela Swat

Pre-Engineering (73%)

Khwaza Khela Swat, Kpk

2015-2017

Professional Experience

Laravel Developer (Internship 6-Months)

Khyber Pakhtunkhwa Information Technology Board (KPITB).

Dec 2022 – May 2023

- ✚ Played a key role in development of the ASSAMI Portal KPITB, a web application.

(<https://assami.kp.gov.pk>)

- ✚ Took Part in the customization of the web application Support Portal for KPITB.

(<http://support.kpitb.online>)

- ✚ My Personal Portfolio website. (<https://irfanali.com.pk>)

- ✚ Contributed to the development of Online Job Portal

- ✚ During my time at KPITB. I gained valuable experience in working with RESTful APIs.

- ✚ As a part of my experience, I successfully developed a portfolio website using Vue.js in conjunction with Laravel.

- ✚ I had the opportunity to work with Laravel Livewire.

- ✚ Integrated Google Maps API.

Full Stack Developer (Full Time)

Codonist (Abbottabad).

June 2023 – Dec 2023

Worked as a Full Stack Developer contributing to the development, maintenance, and enhancement of several web applications across diverse industries including event rentals, laundry services, education, and retail.

- ✚ **Party Rental Studio** (<https://partyrentalstudio.com>)
Built and maintained a customer-facing website for an event rental service.
- ✚ **Party Rental Studio** (<https://app.partyrentalstudio.com>)
Developed full-featured booking and inventory management tools.
- ✚ **HelloLaundry** (<https://hellolaundry.co.uk>)
Contributed to feature enhancements and bug fixes for an on-demand laundry service platform.
- ✚ **Global Honors** (<https://staging.globalhonors.biz>)
Assisted in development and testing for an online academic recognition platform.
- ✚ **Codonist Dashboard** (<https://dashboard.codonist.com>)
Built internal tools for project and team management.
- ✚ **Point of Sale** (<https://pos.codonist.com>)
Developed a POS web application supporting real-time sales and inventory management.

Software Engineer (Full Time)

Smart Intellect (Islamabad).

Jan-2024 – Apr 2024

Worked as a full stack developer on multiple client-facing web applications, contributing to both front-end interfaces and back-end logic.

- ✚ **Lawplus** (<https://www.lawplus.co.uk>)
Contributed to a legal services platform aimed at simplifying access to legal advice in the UK. Focused on streamlining client onboarding and integrating dynamic form generation
- ✚ **Free Mis-Sold Car Finance Claims Checker** (<https://pcp.lawplus.co.uk/no-win-no-fee>)
Developed a claims checker tool enabling users to evaluate and submit mis-sold car finance claims. Implemented a guided form experience, conditional logic, and secure submission handling.
- ✚ **Caglayanyagmur – Doctor Appointment System** (<https://caglayanyagmur-demo.simonpioli.com>)
Built an appointment booking platform for clinics, allowing patients to schedule visits, view doctor availability, and receive appointment notifications. Contributed to front-end development and backend appointment logic.

Full Stack Engineer (Full Time)

Wolfiz Solutions (Islamabad).

May-2024 – Present

Contributing to the design, development, and deployment of scalable web applications across diverse domains.

- ✚ **Indigo – Contractor Management & Ticketing System**
Worked on a robust contractor management system integrated with a comprehensive **ticketing module** for handling client requests, internal tasks, and support issues. Developed role-specific dashboards, task assignment workflows.

RTC

Developed a real-time vehicle rental platform with advanced features, including live vehicle tracking and dynamic availability through GPS integration and Web Sockets. Implemented a remote lock/unlock system accessible via mobile, card, admin panel, and physical key authorization to enhance fleet security and centralized control. Designed a user-friendly booking system with role-based access, driver assignment, and detailed transaction history tracking to streamline rental operations

PSEB – TechDestination Pakistan *(Project Lead)*

Currently leading the development of the PSEB TechDestination portal—a national initiative to promote Pakistan's IT sector. Responsible for system architecture, team coordination, feature planning, and deployment strategies
